# Alligator Shearing Machine

A separate clamper is provided with the cutting arm to minimise the impact of shearing

**Jaw sizes from 4"-36"  
available in various  
variants**

## Data Sheet

<b>Shearing Arm Length</b>	<b>Inch</b>	<b>24</b>
<b>Jaw Opening</b>	<b>Inch</b>	<b>9</b>
<b>Cutting Capacity</b>	<b>Inch</b>	<b>2" round</b>
<b>No. of Strokes / Min</b>	<b>No.</b>	<b>7-8 with clamp 14-15 without clamp</b>
<b>Electric Motor</b>	<b>Hp</b>	<b>15</b>

- ★ The above data is indicative & not binding. This does not guarantee or contains assurances of any kind
- ★ The performance data are strongly dependent on the type and composition of the input material, the feeding density as well as the qualification of the operator
- ★ The company reserves all rights to introduce any modifications
- ★ The equipment shall be under warranty for one year against any manufacturing defect from the date of supply

## Salient Features:

Our 40 years of rich experience in the recycling industry and our commitment of meeting the needs of customers with the desired standards have made Jain Hydraulics a leader in the shears sector. Our outstanding technology and manufacturing quality has set high standards within the industry. We have been completely covering every requirement profile with our various models of shearing machines. The required shear for your production process depends on the average amount & type of scrap to be processed. Thus, we provide you the best for your requirements.

## Benefits

- Powered to shear steel members like re-bars, pipes, angle irons, I-beams etc
- Provision to run in continuous mode to meet high production
- Designed with a separate clamp to minimize impact of shearing
- Extensively used to remove unwanted fittings before recycling

*We make recycling viable*
